## Mixo

The Mixo family of tables is Bristol's response to the less formal workplace and its versatile design looks equally at home in an office lounge or a residence. Mixo's flexibility extends to its function as users may adapt the product to his/her own needs. A homage to Brutalist design, its clean flawless edges are a hallmark of Bristol's eye for detail. Constructing with only one material means a minimal carbon footprint is incurred in its production, a sustainable agenda further reinforced by using mild steel which is endlessly recyclable or made from recycled post-consumer composite.

Creating Mixo requires precision and expertise which begins from laser cutting the metal to skilled metal workers bending its base with a special machine. Installation, however, is a breeze as it is designed to be put together with merely 8 screws. A wide spectrum of colour options allows you to bespoke your very own Mixo - with customised colours available on request. For even more personalisation, monogram your initials or a favourite quote with our laser etching service.

To add a sense of warmth, choose to finish the Mixo table top in veneer.

HPL Top

Sleek and sculptural, the Mixo was designed to look equally at home in a domestic or office environment.

The light and portable table can be moved to where it is required with ease.

The Mixo comes in two heights to suit different functions and requirements.
